# Indian Business Expectations & Consumer Sentiment

**Financial And Business Conditions In Country In  
Next 12 Months**

Business Conditions - 'Net response' is the difference between the percentage of respondents reporting optimism and those reporting pessimisms. It ranges between -100 and 100. Any value greater than zero indicates expansion/ optimism and values less than zero indicate contraction/ pessimism.

**Index consumer sentiments**

Consumer Sentiment Indices (Base Sep-Dec 2015 = 100)

# *Outlook*

# Key Positives & Risks

---

## POSITIVES

- ✓ India's solid relative macro-economic fundamentals
- ✓ High sustainable potential growth rate
- ✓ Robust balance sheets of corporates & banks
- ✓ Likely demand boost from tax concessions, broadening welfare payments and GST rate cuts
- ✓ Government and RBI focused on inducing growth
- ✓ Resilient domestic flows

## RISKS

- x High tariffs imposed by the US impacts India's competitive position in a few labour-intensive sectors
- x Increased supply in response to upturn in equity market can potentially cap returns
- x Volatile geopolitics
- x Competitive welfarism, compulsion of coalition politics

**While headwinds from external factors may continue for a while, the much-awaited domestic consumption growth likely to pickup in the months ahead- lifting EPS growth trajectory & improving prospects**

# Key Sectoral Positioning

## OVERWEIGHT

- ❑ **Consumer Discretionary:** Budget incentives through direct tax-cuts, GST rate cuts should improve demand. Growth may lead to attractive risk-reward for the sector.
- ❑ **Capital Goods/Industrials:** Significant under-investing in the past in select sub-segment has exacerbated demand-supply imbalance. Pockets of Power Transmission & Distribution, Defense sector look attractive.
- ❑ **Telecom:** Expected Average Revenue Per User increases may lead to higher accruals in profitability and cashflows

## UNDERWEIGHT

- ❑ **Energy & Utilities:** Weak demand environment leading to uncertainty in profitability
- ❑ **Information Technology:** Uncertainty in macro environment and currency levels are key risks though valuations have seen correction.

# The Fair Value Spectrum- 5 years view

# Fixed Income Outlook

- ✓ Growth inflation dynamics have turned favorable with lower inflation expectations. The recent series of repo rate cut may aid in holding up growth.
- ✓ In the last MPC, 2 members voted for a change in stance.
- ✓ RBI had already revised down fiscal 2026 inflation to 2.7% from 3.1% in last MPC.
- ✓ Real policy rate is expected to remain positive (Repo Rate@5.5%, Projected inflation at 2.7% for FY26)
- ✓ Fiscal deficit to reduce from 4.8% of GDP last fiscal year to 4.4% this fiscal year (Source: Budget documents); latent demand from Banks, growing demand from insurance and pension funds, higher FII inflows from global bond indices inclusion will further support bond prices
- ✓ The Reserve Bank shall continue liquidity management operations in alignment with the monetary policy stance, ensuring that system liquidity remains sufficient to meet the demands of the productive sectors of the economy.
- ✓ The announcement of various liquidity management measures by RBI gives assurance that the liquidity needs of the system shall be addressed adequately.
- ✓ The CRR cut by 100 bps to 3.0%, in four tranches of 25bps each between September and November 2025 will infuse liquidity, aid in rate transmission and support bond markets.
- ✓ Globally other major central bank have already started cutting rates
- ✓ Geopolitical risks, uncertainty from new US administration, fiscal health of states, remain key risks
- ✓ Actual transmission of rates yet to happen. There is scope for further spread compression.
- ✓ Absolute yield levels and spreads seem attractive from a medium to long-term investment horizon. Term spreads have turned attractive. MTM gains to accrue as rates continue to soften and spreads compress over a period of time.

# Macro Economic State: In House High Frequency Leading Indicator

- **In House High Frequency Leading Indicator:** While the GDP numbers are released with a lag of 2 months, our inhouse model created based on leading economic indicators provides information on the state and trajectory of domestic economy with a lead time of about 1-2 months
- This tool acts a guiding tool for fixed income investments.

# Indian Equity Market Performance- Rolling

## Sensex data since inception

| Period          | Minimum Returns | Average Returns | Standard Deviation | +ve Returns | -ve Returns | Return to Risk Ratio<br>(Average Returns/Standard Deviation) |
|-----------------|-----------------|-----------------|--------------------|-------------|-------------|--------------------------------------------------------------|
| 1 Year Rolling  | -56.1%          | 18.4%           | 31.9%              | 73.7%       | 26.3%       | 0.58                                                         |
| 3 Year Rolling  | -18.5%          | 15.5%           | 15.4%              | 89.3%       | 10.7%       | 1.01                                                         |
| 5 Year Rolling  | -7.9%           | 15.3%           | 11.7%              | 92.9%       | 7.1%        | 1.31                                                         |
| 7 Year Rolling  | -7.6%           | 14.9%           | 9.0%               | 94.9%       | 5.1%        | 1.66                                                         |
| 10 Year Rolling | -2.8%           | 14.8%           | 7.1%               | 99.2%       | 0.8%        | 2.09                                                         |

**Longer the investment is held, lesser the probability of negative returns.**

Source: Union AMC Internal Research & Bloomberg; Daily rolling returns are calculated for the period 03-04-1979 to 30-09-2025 by the CAGR approach. Example: For 1 Year Return, the first data point will be CAGR between 01-04-1979 to 01-04-1980, similarly the next data point would be CAGR between 02-04-1979 to 02-04-1980. The last data point would be CAGR between 30-09-2024 to 30-09-2025. Returns are calculated in a similar manner for other time frames (3, 5, 7, and 10 Years). The Index used is BSE Sensex. **Past Performance may or may not be sustained in the future.** Index performance does not signify the performance of any schemes of Union Mutual Fund.

# What Returns Did Different Asset Classes Give In The Last 20 Years?

Source: CEIC, Bloomberg, IIFL Research; Data as of December 31, 2024
